

A Message From the President of Unitel, Mark Worster

BOSTON, MA – August 2,
2007 –

For Our Valued Customers

What would you do if you got to the office on Monday morning and you could not access your company data....for the entire day?...for a week?...for longer? If this happened now, how long would it take you to get back up and running? Would the downtime and lost productivity cost your business?

As data storage becomes simpler and cheaper to deploy across the network, your organization is undoubtedly creating larger amounts of information and becoming more and more dependent on this data.

Your current data backup solution may be adequate at the present, however as data volumes grow the chances are you will need to consider an alternative backup and restore solution. Unitel in partnership with Network Access Corporation now provides it's customers with a cost effective and secure daily backup, restore, and data management service that keeps pace with your business. Some users never use tape backup again. Others simply use data vaulting as a way to protect their most critical

information. Data is offsite and encrypted, with the ability to recover a file in seconds or even the entire network back to any alternate location.

Data Vaulting gives you an automated backup/restore strategy and solution in one!

Data Vaulting is an automated backup and restore solution for network-wide servers, desktops and laptops and is particularly suitable for:

- **1GB of data and upwards**
- **Data held on Windows/Novell/Linux/Unix systems**
- **Companies who have experienced data loss or backup problems**
- **Companies with remote locations**
- **Companies with business critical data**

As well as backing up ordinary data files, Data Vaulting also provides backup for:

- **Microsoft Exchange Server**
- **Microsoft SQL Server**
- **Lotus Notes**
- **Novell Groupwise**
- **Oracle**

YOU MAY BE INTERESTED TO SEE HOW THE SERVICE WORKS FOR YOU, WHICH I WOULD BE HAPPY TO ARRANGE.

If you would like to find out how Data Vaulting can provide you with a complete, automated backup strategy and solution, please contact me at (781) 575-9696 and I will arrange for a complementary evaluation account. More information can be found in the attached.
